OITB Pathway –
From Science To Health Services

OITB Pathway as Single Entry Point

Our Association helps you in finding ALL the right partners, that you need on your Pathway to implementation.

We implement a Single-Entry-Point for you

- The Single Entry Point is your open door to all the relevant services, from Idea to Implementation
- In our database you will find the right consulting to help you: pick the service, that is right for you AND at the right time
- For your project, we help you with project and requirements management
- We speed up your product development and support implementation in health market

Your Pathway is individual

- We, together with our network of excellence, help you to find your individual Pathway to implementation. Building on proven scientific methods, we identify together with you, how your ideas can translate successfully into better health for our society
- From our database of world class institutions and domain experts, you can pick the right option for you. The Pathway that you and we will develop together will be (among others) based on Early Advice, Regulatory Advice, HTA and Horizon Scanning.

In our database, you will also find your right partner for specialized services, such as characterization, in-vitro, in-vivo studies and in-silico-modelling.

The information provided by us is also appreciated by those, who make the investment decision: policy and decisions makers, public investment organizations.

We connect unmet health needs with market opportunities in healthcare systems and consumer health markets.
